Success Stories: Accelerate

Accelerate has a successful track record. Check out these success stories to learn how Accelerate can restore your sanity!

Industry Sector: Behavioral Health

Problem:

- Employees were emailing hundreds of audit/financial forms back and forth to each other
- Employees had difficulty keeping track of where all the documents were in the process

Solution:

- Accelerate now coordinates all audits, organization-wide
- System keeps track of hierarchal approval structure so customer billings aren't overlooked

Result:

- *Centrally located records/improved audit trails → Improved resident care with reduced risk*
- *Dashboards/weekly reports/notifications improved response times to business-critical items*
- *Increased productivity → 200%; annual savings → $45K; development cost savings → $250K*

Industry Sector: Medical Billing

Problem:

- Billing vendor had to manually divvy up billing tasks to employees through a painstaking process
- In-process status was lacking, because completed work had to be manually tallied at day's end
- This lack resulted in unassigned work being manually divvied out to employees later than planned

Solution

- Accelerate allowed them to automatically assign work, omitting the reassigning the "I forgot's"
- Real-time status now gives instant visibility into each step of the process

Result:

- *Productivity increase of 200% with coding output; 300-400% increase in data entry output*
- *Non-Accelerate projects of this size typically cost $650-$750K → Project cost was only $70K!*
- ***These results have been achieved with only 20% of the current process being automated***

Success Stories: Accelerate

Industry Sector: Transportation

Problem:

- Client received quote of +$1M to create a system for tracking claims across multiple parties
- Old process was decentralized and required frequent, multiple emails to determine status

Solution:

- Accelerate now automatically tracks status with real-time metrics for in-process items
- Email notifications are automatically generated to notify interested parties of item status
- Accelerate now provides employees real-time access to info in response to customer inquiries

Result:

- *Achieving 30-40% yearly savings over the previous process*
- ***Cost savings of $980K on build and implementation; it cost only $20K for this project!***

Industry Sector: Stocks

Problem:

- Process steps for stock purchases were unclear, resulting in process inconsistencies
- In-process work status was non-existent, because completed work was manually tallied end-of-shift

Solution:

- Accelerate now provides consistent steps that lead to employees making next-best decisions
- Approval process provides quick authorization capabilities with real-time insight into the process

Result:

- *30% increase in efficiency*
- *50% reduction in risk*
- *$180K savings on build and implementation*
